

# *Over European Art, a Neuroarthistory*

Volgens Yale University Press:

“This provocative book offers a fascinating account of neuroarthistory, one of the newest and most exciting fields in the human sciences. In recent decades there has been a dramatic increase in our knowledge of the visual brain. Knowledge of phenomena such as neural plasticity and neural mirroring is making it possible to answer with a new level of precision some of the most challenging questions about both the creative process and the response to art.”
