"Charles Murray has made the first audacious attempt to quantify individual genius....A shocking, stimulating, and entertaining exercise."
—Paul Johnson, author of *Modern Times*

The Pursuit of Excellence in the Arts and Sciences, 800 B.C. to 1950

Human Accomplishment

CHARLES MURRAY

*Coauthor of the New York Times Bestseller *The Bell Curve**

Over Human Accomplishment

Volgens HarperCollins Publishers:

“'At irregular times and in scattered settings, human beings have achieved great things. Human Accomplishment is about those great things, falling in the domains known as the arts and sciences, and the people who did them.'

So begins Charles Murray's unique account of human excellence, from the age of Homer to our own time. Employing techniques that historians have developed over the last century but that have rarely been applied to books written for the general public, Murray compiles inventories of the people who have been essential to the stories of literature, music, art, philosophy, and the sciences—a total of 4,002 men and women from around the world, ranked according to their eminence.”
