

THE REGENERATIVE CITY CHALLENGE

10-16 July 2022

Are you interested in designing the city of the future? Join us for the *Regenerative City Challenge* in Amsterdam.

During this summer school, you will work on the transition to a more regenerative version of the city of Amsterdam. What is needed for such a city? And how can it be implemented? You and your fellow students will find an answer to these questions during a mix of activities: workshops, team projects, fieldwork and public programs.

What you can expect:

A deep dive into regenerative leadership and our stewardship for a thriving city. Nature, fire, food, and conversations that matter. The city as our curriculum, with learning journeys, meeting key players, different kinds of knowing, unlikely allies, and places of potential. Creative and social interventions, dialogue, and reflection to liberate the potential of our communities and places. Public programs and events to delve into what can make the city thrive.

PRACTICAL INFORMATION

- This challenge lasts 1 week, **10 till 16 July**.
- You will work full-time on the challenge during this period.
- For 3rd year Bachelor's, Master's, PhD and Honours students from TU/e, WUR and UU.
- The language of instruction is English.
- The week consists of workshops, fieldwork, community life, team projects, personal growth, public programs, and closing event.
- You will stay on a campsite in Amsterdam, more info upon registration.
- 1,5 ECTS.
- More information: [The Regenerative City – Challenging Future Generations \(ewuu.nl\)](https://www.ewuu.nl)
